 - No restrictions on air transport
 - Battery charge indicator
- 20.5 x 21.5 x 10.1 inch

COSMAS LEATHER BOOTS

VULCAN 14" bunker boot for structural firefighting

Black, pull-on, leather/fabric bunker style boots with combination midsole/ladder shank/puncture resistant device for added support and comfort with less weight. Full-grain, water-resistant leather upper, ankle guard, Achilles flex point, safety toe, tibia guard, micro fiber suede heel slide, and nitrile rubber toecap for fire service personnel.

These boots come in three widths so there should be a fit for everyone. Accordion-style flex points behind and in front of the ankle allow the boot to flex where you do, providing improved range of motion. Features a stand off on heel for ease of doffing. These are the lightest leather boots on the market.

Anti-microbial removable footbed with molded EVA heelcup and arch, which conforms to your foot providing comfort and support.

3 year warranty on normal wear and tear.

Come see these and other products at the Maritime Fire Chief's convention at the NB Casino in July. If you cannot make it call and will be happy to come to you and show you our new products.
